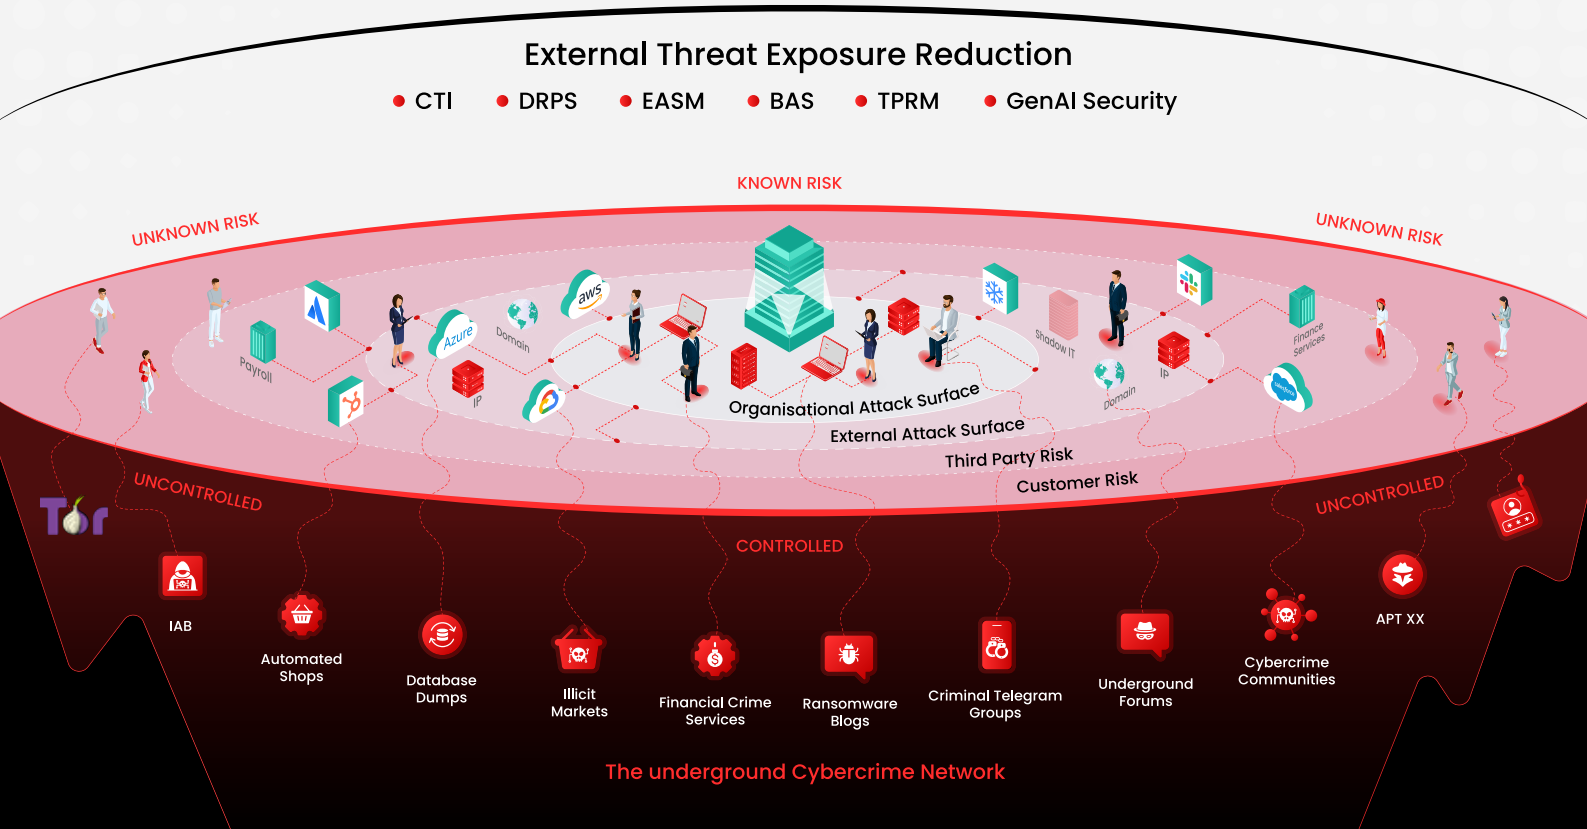
KELA is redefining how organizations discover, monitor, and reduce risk from external threats — both known and unknown, managed or unmanaged. By combining our proprietary CTI Platform with External Attack Surface Management (EASM), Third-Party Risk Management (TPRM), and deep cybercrime intelligence, KELA empowers organizations to continuously reduce their exposure to external threats (CTEM) — at any scale, from a single enterprise to the national level.

KELA



Solutions driven by real-time cyber threat intelligence

Dark Web Monitoring

Delivers full visibility into the cybercrime underground, empowering early threat detection and fast, informed incident response.

Cybercrime Investigations

Empower your team with real-time intelligence, deep access to criminal networks, and detailed threat actor profiling to uncover, track, and disrupt cybercriminal activity with precision.

Ransomware Protection

Stops attacks before they start by intercepting compromised employee credentials in real-time, with seamless integration and instant ROI through rapid, automated remediation.

APT Intelligence

Delivers end-to-end visibility into nation-state threat actors, enabling targeted threat hunting, deep TTP insights, and global intelligence to strengthen your defense against advanced persistent threats.

Phishing and Brand Protection

Defends your organization from external threats by detecting and removing phishing, impersonation, and brand misuse—safeguarding identities, customer trust, and your reputation.

Supply Chain Risk

Gives you full visibility into third-party cyber risks with automated assessments and predictive scoring—enabling fast mitigation, stronger supplier trust, and a more secure supply chain.

Exposure Management

Delivers complete visibility into your external attack surface, enabling proactive risk identification, validation through breach simulation, and reduction of exploitable vulnerabilities.

GenAI Security

Simulate real-world attacks to uncover vulnerabilities and secure your generative AI systems against emerging threats with KELA's Red Teaming solution.

Identity Protection

Enables proactive detection and prevention of identity-related threats by intercepting compromised credentials in real time and automating response to reduce risk and workload.

AI-Driven Digital Cyber Analysts

Operate 24/7 to continuously monitor threats, proactively deliver intelligence, and seamlessly integrate into your workflows as a true extension of your security team.
